## Investment Strategy

TT UK Equity targets strong excess returns via fundamental bottom-up stock selection, operating within an integrated top-down macro framework.

Stocks and other equity related securities are selected on the basis of a rigorous and systematic investment process, which seeks to identify attractively valued companies in the context of their assets or earnings; verify their investment case via a variety of different sources; and identify the catalyst that will release value.

The team is not constrained by style and is prepared to move the portfolio actively, enabling the investment manager to invest in attractive opportunities wherever they occur. TT's 'sell discipline' is critical to the process, as knowing when to sell is as important to the success of the strategy as knowing what and when to buy.

## Why TT?

TT International offers a range of long only and hedge fund strategies designed to meet clients' objectives and risk budgets. It has over 20 years' experience of conviction investing and a strong track record of delivering compelling risk-adjusted returns.

Central to TT's success is the strength of its research platform - the Ideas Factory located in London and Hong Kong - who collaborate to explore and exploit market opportunities. Rigorous debate drives TT's research expertise and idea generation but all portfolios have individual accountability and decision making.

The main source of alpha generation is bottom-up fundamental stock selection. Due to a preference for liquid stocks, most large positions will be mid to large cap but investments in smaller cap stocks occur on an opportunistic basis.

Portfolio construction is the synthesis of idea generation, conviction and risk management. The team targets concentrated portfolios of 25-50 holdings.

A disciplined approach to risk management aimed at capital preservation and controlling downside risk, is reinforced by TT's independent risk management team.

TT's profile in the market affords it excellent access to companies. We believe this enhances our ability to develop a research edge.

All TT portfolios benefit from the resilience of the underlying operational platform and robust risk management. TT's comprehensive risk management approach is fully embedded into investment process and includes an iterative process between the portfolio manager and the risk team to optimise but control portfolio risk. Ultimately the risk team has independent oversight, with clear escalation process to the COO.
